

PRODUCT UPDATE

1780 50 WATT TRANSFORMER

Now with Wi-Fi communication

- Can be controlled with Alexa and Google Home
- New Apple and Android Apps for Wi-Fi setup

Upgraded to Bluetooth 5

- Increased range and speed
- Apple and Android Apps will remain the same for Bluetooth control

- **Wi-Fi capabilities have been added and you can now link the transformer to Alexa and Google Home.**
- **Now with Wi-Fi, the lights can be controlled on your phone from anywhere you have internet access through Alexa or Google Home (previously had to be within Bluetooth range).**
- **When connected to Alexa or Google Home, the photocell does not need to be mounted in a location for daylight sensing. This can simplify installations. (Can still use photocell when not Wi-Fi controlled).**
- **Using Alexa and Google Home will allow you to link multiple transformers together to create groups/zones.**
- **Voice commands in Alexa or Google Home will allow you to turn on and off lighting or change dimming levels.**
- **Routines set up in Alexa or Google Home will also allow you to turn lights on and off or change dimming levels.**
- **Remote key fob eliminated and unavailable.**
- **All transformers with S/N:24-00001 and higher will have Wi-Fi.**

New shipments of the updated transformers will have this label on the packaging to help easily identify the Wi-Fi Version:

UPDATED
